

Screen	Notes
AbaQuest 4	
Welcome	Here's a screen shot with text. Step 1- Welcome and Encouragement "Great job AbaQuester! You've learned so much already. Today we'll learn to add using our Junior Counter and practice the Freeze Rule!" 
 The screenshot shows a lesson interface. At the top, a green banner contains a speaker icon and the text: "Freeze! Adding zero means nothing changes! Set the abacus to 5. Adding zero changes nothing!". Below this, it says "Lesson 1 of 3" and displays the equation $5 + 0 = ?$. A junior counter is shown with five yellow beads on the top rod. A small tooltip points to the counter with the text: "Hope shared folder ...sharepoint.com/personal/_onedrive.aspx?id...".	1. Pre-test- needs a transition 2. Getting the 1st lower bead back down doesn't respond once it has been engaged towards the answer rod 3. I want to tie the 'adventure' aspect to the 'story mode' so at the end of the pre-test- the button should say: "let's learn" or something.

Here's a shot of the mini lesson for AbaQuest 4

Step 3- Mini lesson and Guided practice (+0)

Abby: "Welcome back, AbaQuesters! Mistress Creola is ready to teach us how to *add* with our Junior Counter. Are you ready to focus and freeze when she says Freeze?!"

Yes, let's go

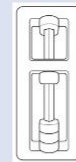

Step 3- Mini lesson and Guided practice (+0)

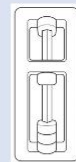

"When we add zero, we freeze. Nothing moves and the number stays the same. Ready? Let's freeze like statues!"

Dev. Instructions
Counter shows 1 bead up. User taps 'Freeze' button → beads vibrate then stop; chime sound.

Abby: Now, let's add 4 to zero
Dev. Instructions: User sees one remain; and glow.

+0

+1=

Step 3- Mini lesson and Guided practice (+0)

"When we add zero, we freeze. Nothing moves and the number stays the same. Ready? Let's freeze like statues!"

Counter shows 3 beads up. User taps 'Freeze' button → beads vibrate then stop; chime sound.

Abby: Now, let's add 4 to zero

Dev. Instructions: User sees the 3 position remain; and glow.

+0

=3

Dev. Instructions
Counter shows 1 bead up. User taps 'Freeze' button → beads vibrate then stop; chime sound.

What's missing from AbaQuest-4

1. Each AbaQuest needs to have:
 - a. Welcome
 - b. Pre-test
 - c. Mini lesson/ practice
 - d. Image-rich Story (quest)
 - e. post-test
2. Obvious transition from module to module
